# BW37 – Discussions on Monetary Policy Issues

**Content:**

This course addresses current topics relevant for monetary policy. Topics covered in this seminar are for example:

- Central Bank Digital Currencies
- Monetary Policy and Climate Change
- Financial Stability
- Central Bank Communication
- Inflation
- Distributional Effects of Monetary Policy
- Transmission of Monetary Policy
- Sovereign Debt

More specific topics will be introduced at the first meeting.

**Target Group:**

B.Sc. students in Economics, Business Administration or PPE.

**Organization:**

Students are expected to present their assigned topic (20-25 minutes) in groups, to actively participate in discussions and to write a brief protocol (max. 1 page) for one of the other topics. We will meet weekly during the semester. During the first meeting, the specific topics will be introduced. The first meeting is on Tuesday, 20.10.2026, lecture hall 24.21, in room 03.86, 16:30-18:00.

**Language:**

The seminar (meetings, presentations, discussions, protocols) will be conducted in English.

**Number of Participants:**

Max. 20.
